Volume 144

JACQUES A. L. SILVA (Porto Alegre, Brazil)
Reproductive Schedules in a Density-Dependent Recruitment Model 1
QI ZHENG (Jefferson, Arkansas), WERNER K. LUTZ (Wurzburg, Germany), AND DAVID W. GAYLOR (Jefferson, Arkansas)
A Carcinogenesis Model Describing Mutational Events at the DNA Adduct Level 23
YANN MERLÉ AND FRANCE MENTRÉ (Paris, France)
Stochastic Optimization Algorithms of a Bayesian Design Criterion for Bayesian Parameter Estimation of Nonlinear Regression Models: Application in Pharmacokinetics 45
F. R. YEATTS (Golden, Colorado)
Another Look at Parastichies 71
H. M. BYRNE (Manchester, United Kingdom)
The Effect of Time Delays on the Dynamics of Avascular Tumor Growth 83
B. MILAN HORÁČEK AND JOHN C. CLEMENTS (Halifax, Nova Scotia, Canada)
The Inverse Problem of Electrocardiography: A Solution in Terms of Single- and Double-Layer Sources on the Epicardial Surface 119
ABDUL-AZIZ YAKUBU (Washington, DC)
Prey Dominance in Discrete Predator-Prey Systems with a Prey Refuge 155
